Election/Restrictions

This application contains claims directed to the following patentably distinct species;

Species I, claims 1-2, 15-16 are directed to the first level and second level for the power supply to the glow –discharge apparatus is stopped,

Species II, claims 3-9, 12-14 are directed to a traveling wave voltage greater than $V_{fmax} * .05$ for power supply to the glow –discharge apparatus is stopped.

Species III, claims 10-11, 24-25, 27-28 are directed to determined impedance matching for third level to power supply to the high frequency power source is stopped for the glow-discharge apparatus.

This application contains claims directed to the following patentably distinct species;

The species are independent or distinct because species I contains the first level and second level for the power supply to the glow –discharge apparatus is stopped.

The species are independent or distinct because species I contains elements and /or limitations not includes in species II and III, and vice versa. That is, they are mutually exclusive.

The species are independent or distinct because species II contains a traveling wave voltage greater than $V_{fmax} * .05$ for power supply to the glow –discharge apparatus is stopped.

The species are independent or distinct because species II contains elements and /or limitations not includes in species III and I, and vice versa. That is, they are mutually exclusive.

The species are independent or distinct because Species III contains a determined impedance matching for third level to power supply to the high frequency power source is stopped for the glow-discharge apparatus.

The species are independent or distinct because species III contains elements and /or limitations not includes in species II and I, and vice versa. That is, they are mutually exclusive.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.
MPEP § 809.02(a).
